

دورات وورشات عمل فنية متخصصة

	الدورة / الورشة
1	Ground Improving for Construction Sites Using Geosynthetics
2	Evaluation and Testing for Geotechnical Materials
3	Slope Instability Analysis and Prevention
4	Design of Earth Retaining System and Bund Walls
5	Design of Shallow and Deep Foundation
6	Design of Shallow and Deep Excavation Support and Excavation Shoring ¹
7	Safety Inspection and Analysis of Dams and Water Retaining Systems
8	Subsurface Exploration and Reconnaissance for Construction Projects
9	Geotechnical Properties of Soil and Rocks
10	Design of Piles and Piers Foundation
11	Design of Sanitary Landfill
12	Soil Instrumentation and Testing for Construction Projects
13	Soil Evaluation and Testing for Road Construction
14	Chemical Plants Troubleshooting
15	Valves Engineering
16	Hydraulic Systems
17	Corrosion Engineering
18	Basic Chemical Engineering
19	Pumps and Compressors
20	Water Resources Management
21	Waste Water Treatment
22	Advanced Processes Control
23	Industrial Design of Molds, Dies, Jigs & Fixtures
24	Introduction to GSM
25	GSM for Intermediates
26	Advanced GSM
27	Principles of Microwave
28	Microwave Planning
29	Nokia UltraSite Base Stations
30	Nokia FlexiHopper Microwave
31	Management and Operation of TRuepoint Radio
32	Management and Operation of MicroStar Radio
33	Star View Network Management Software, HPOV Management system
34	HUAWEI Optix OSN 1500/3500 & T2000
35	NEC Digital Microwave System Pasolink V4, Pasolink NEO, PNMSj, PNMTj
36	ZTE ZXG10-BSS(SDR)
37	HUAWEI GSM BSS(BSC 6000) Field Operation and Maintenance
38	Developing Mobile Applications
39	Cellular Communication System

40	Control Systems
41	Wireless Communication
